

IN THE DRAWINGS

Please add new drawing sheets 14-17 to the application.

## REMARKS

In a telephone call with Examiner Spooner on July 5, 2005, the undersigned proposed amending the specification of the application to include specific material described in parent U.S. Patent Application Serial No. 09/512,963. On July 20, 2005, Examiner Spooner indicated he believed the amendment would be acceptable, and would consider it. The reason for this amendment is because parent U.S. Patent Application Serial No. 09/512,963 has not issued and has not been published, but the included material is important to the understanding of the claims in this patent application. To make the specification more complete as required by MPEP 608.01(p).I.A.1, the undersigned proposed amending the specification of this application to include the descriptive support for the claims.

This amendment includes the language from pages 11-17 of U.S. Patent Application Serial No. 09/512,963, along with the related drawings: FIGs. 3-5G and 13. Other than renumbering the figures, figure reference numbers, and equations, the only other change is the inclusion of equations (3a), (3b), and (3c), which can be found on page 10 of U.S. Patent Application Serial No. 09/512,963 (numbered there as equations (1a), (1b), and (1c)), along with supporting explanation of the equations. The undersigned notes that the proposed amendment replaces the one paragraph beginning on page 3, line 27 of the application with the text shown on pages 2-9 of this amendment.

Applicant respectfully submits that the above amendments do not materially affect the application. Applicant respectfully requests the Examiner to enter the amendment. Applicant understands that the deadline for payment of the Issue Fee continues to run from the June 9, 2005 date of mailing of the Notice of Allowance.

Respectfully submitted,

MARGER JOHNSON & McCOLLOM, P.C.
